

Advanced cleaning solutions for automated instrument reprocessing

With standards creating evermore exacting demands on CSSD, advanced cleaning solutions are required to ensure efficient, effective and reliable automated reprocessing of a range of surgical devices. The professional CSSD is expected to clean, disinfect and sterilise a wide variety of instruments, utensils and accessories on a daily basis. With the deconex® range of products the Medical Division of Borer Chemie AG in Switzerland offers you an innovative selection of state-of-the-art quality cleaning and disinfection solutions for professional automated reprocessing of your medical devices. Benefit from our experience.

Advantages offered by deconex®

Efficient

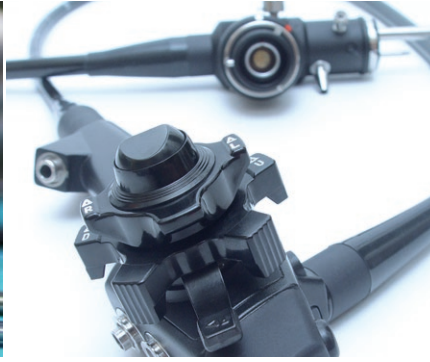

- Innovative formulations for neutral, enzymatic, mildly alkaline and alkaline cleaning processes
- Excellent cleaning and disinfection power
- Broad microbiological properties
- Outstanding material compatibility

Safe

- Certified quality products
- Compliance with highest hygienic requirements
- Extensively tested efficacy, safety and material compatibility
- Environmental-friendly, biodegradable products
- High user acceptance

Economical

- Synergetic effect of quality ingredients for highest efficiency at minimum dosage
- High quality concentrates for cost-effective use
- No neutralization required
- Suitable for all water qualities
- Economical dosages

deconex® - the advanced solution for high quality automated decontamination and hygienic care in clinical settings

Our recommended products for automated reprocessing:

- ← Surgical instruments
- ← MIS instruments
- ← Anaesthetic equipment
- ← Dental instruments
- ← Rigid endoscopes
- ← Flexible endoscopes
- ← Containers
- ← Ward instruments
- ← Bedpans, urinals etc.
- ← Bedsteads, OR tables etc.
- ← Baby bottles
- ← OR shoes
- ← Anodised aluminium containers
