

deconex® HT 1219

Acid cleaning concentrate for deoxidizing non-ferrous metals

Suitable for use in spray and ultrasonic cleaning systems

Application

deconex HT 1219 is a liquid, acid cleaning concentrate. It removes oxide films from non-ferrous metals in spray and ultrasonic cleaning systems.

Properties

Due to its excellent wetting properties, deconex HT 1219 removes oxide films uniformly from copper and copper alloys. At the

Dosage

In practice, the following dosage has given good results:

Dosage	Temperature	Exposure time
2-5 %	20-60 °C	2-5 min

Information on use

In spray processes, the product should not be used at temperatures below 45 °C due to foam formation.

Neutralization

The spent cleaning solution must be neutralized before it is discharged into drains or sewage works. To attain a pH of about 7-8 requires 296 g of 50% potassium hydroxide solution per kg of deconex HT 1219 (concentrate).

Disposal of the detergent solution including removed contamination must be carried out in accordance with the local regulations for wastewater!

same time the metal regains its original metallic lustre and shine. This product is used especially after alkaline precleaning.

Ingredients

Inorganic acids, surfactants

Material compatibility

Suitable for:
Non-ferrous metals, chrome steel, inox, silver

For materials not mentioned please make your own specific compatibility tests or consult Borer Chemie AG.

deconex® HT 1219

Chemical/physical data

pH	1% solution in demineralized water	approx. 2.2
Density	concentrate	1.11 g/ml
Appearance	concentrate	transparent, colourless to slightly yellowish liquid

Availability

Please ask your local representative about current container sizes.

Containers, screw caps and labels are made of recyclable polyethylene.

Additional information

For information concerning safety at work, storage and waste disposal/effluent, please consult the corresponding safety data sheet.
