

deconex® HT 1408

Highly alkaline metal cleaner for stainless steel and titanium

Suitable for immersion baths and ultrasound equip-
ment

Usage

deconex® HT 1408 is a liquid, highly alkaline cleaning concen-
trate for the removal of polish residue, fingerprints, dust, oils
and oil emulsions from stainless steel and titanium.

deconex® HT 1408 can be used both for pre-cleaning and for
fine cleaning.

Properties

Thanks to its alkaline content, deconex® HT 1408 exhibits
excellent cleaning properties. Surfactants contribute towards
excellent wetting of the substrate and allow the
rapid removal of dirt.

Dosage

The following dosages have been found to be effective in practice:

| Cleaning | Dosage | Temperature | Exposure time |
|---|--------|-------------|---------------|
| Immersion bath and ultrasound equipment | 1-5% | 50-70 °C | 3-10 min |

Instructions for use

Can be used in municipal water, preferably in reverse osmosis
or de-mineralised water.

For professional use only.

deconex® HT 1408 creates a residue-free surface during the
final rinse of stainless steel and titanium.

Constituents

- Alkali
- Solubilising agent
- Surfactants
- Chelating agents
- NTA-free

Material compatibility

- Titanium
- Stainless steel

Independent compatibility tests should be carried out on
materials other than those specified or requested from Borer
Chemie AG.

deconex® HT 1408

Chemical / physical data

| | | |
|------------|---------------------------|------------------------|
| pH value | 1% in demineralised water | approx. 12.0 |
| Density | Concentrate | 1.09 g/mL |
| Appearance | Concentrate | clear, yellow to brown |

Delivery

Please ask your representative regarding current container sizes.

The containers, seals and labels are made from recyclable polyethylene.
